6 has added a variety of new features There will always be those who claim that FL Studio isnt as serious as some other DAWs, but the facts suggest otherwise, and it has some notable fans in the pro community, too.. A DAW can be used throughout the music production process: for recording, editing, arranging, mixing and even mastering.. In terms of value for money, Cockoss Reaper is hard to beat - this is a serious DAW at a stupidly low price - and Logic Pro offers significant bang for your buck, too (again, thats Mac-only, though).. In truth, any one of these products will enable you to make music, but theyre all slightly different in the way that they operate, so its worth taking the time to consider your options carefully.
